

## IMPARTIALITY STATEMENT

5<sup>th</sup> June 2018

The Materials Testing Department, a division of Dunelm Geotechnical & Environmental Ltd, is accredited by the United Kingdom Accreditation Service (UKAS).

As part of the accreditation we are required to have in place arrangements to ensure that the laboratory is independent from any pressures – commercial, financial, or others, which may adversely affect the quality of test and resulting reports.

The Principal Engineer (Materials) has no direct involvement in the Managing Director's involvement with other similar organisations to avoid any potential conflicts of interest and to ensure impartiality

If you have any queries regarding any aspects of the laboratory please contact one of the undersigned.

Gary Dresser  
Managing Director
